 Warning	 Caution	 Note
Potential death or serious injury inducing hazards.	Potential danger of injury or property damage.	Provides additional information to emphasize the main text.

Safety information

The purpose of this section is to ensure that the user uses the product properly to avoid danger or property damage.

Before using this product, please read this instruction manual carefully and keep it in a safe place for future reference.

Warning

- Never disassemble or modify the acoustic camera battery. The battery is equipped with safety and protective devices which, if tampered with, may cause the battery to overheat and may also cause an explosion or burn. If the battery is leaking and the

leak gets into your eyes, do not rub it, wash it with water and get immediate medical attention.

- If the unit is not working properly, contact your dealer or our company and do not disassemble or modify the unit in any way (unauthorized modifications or repairs cause problems at your own risk).

Caution

- Protect the acoustic sensor array from stains, dust and liquids, otherwise it will affect the performance of the acoustic camera or even cause permanent damage.
- Avoid using the product in humid, dusty, extremely hot or cold environments, please refer to the product's parameter table for specific temperature and humidity requirements.
- It is strongly recommended to use the original power adapter, the specific requirements of the power adapter are shown in the product data sheet.
- To prevent the potential danger of data loss, always make a copy (backup) of your data on a computer.
- When storing the acoustic camera, it is strongly recommended to use the original box and to keep it in a cool, dry, ventilated environment free from strong electromagnetic fields.
- When shipping the acoustic camera, it is strongly recommended that it be shipped protected in its factory packaging.

19	SD Storage Card Interface	For inserting the SD card
20*	Nano SIM Port (Optional)	For inserting Nano SIM card
21	USB Type-C Interface	For connecting to a USB Type-C cable

Inserting and Removing the Battery

2.1 Inserting the battery

Push the battery into the battery socket. When the battery is fully inserted, it will make a distinct 'click'.

2.2 Removing the battery

Turn off the device, squeeze the snatch of the battery and take it out.

Charging

When using the acoustic imager for the first time or when the power is low, please charge the acoustic imager.

3.1 Charging through the charging dock

For quick charging take out the battery and mount it on the charging dock.

The voltage of the charging dock is 5VDC, please use the USB-C cable and the adaptor that came with the device.

Operation Procedures

1. Mount the battery to the charging dock.
2. Connect the charging dock to the power source.
If the dock is functioning normally, one of the

LED indicators will glow green.

3. The other LED indicator indicate the charging status of the battery:
 - Red: charging
 - Green: charged
4. When fully charged, take out the battery and disconnect the dock from the power source.

3.2 Charging directly with DC 5V

For expedient charging, directly charge the thermal imager through a DC 5V power adapter.

Operation Procedures

5. Insert the battery
6. Lift the cover for USB-C interface
7. Connect to a power source and start charging

Mounting on a Tripod

If the user need to make prolonged observation or measurements, we advise mounting the camera on a tripod. The device support connecting to a tripod via a UNC 1/4-20 interface. (16th item in the Parts and interfaces table.

Connecting to Mobile and PC Software

Scan the following QR codes to download the PC software.
